TOPAZ 10/1V

The Hapro Topaz V with its mobile 4-caster stand is unique among our home tanning products. Perhaps you want to sunbathe while lying on the bed, while sitting, or even standing – the Hapro Topaz V offers supremely flexibility! There is a version to suit everyone's particular requirements; especially since the Hapro Topaz V range includes versions with 8 up to 12 tubes.

Feel balanced

Sunlight is well-being - pure and simple. The sun's rays have a positive effect on our bodies, they boost our immunity system, help us to form vital vitamin D, also they induce a feeling of well-being. No wonder that, with a "Home Sunshine" appliance, an increasing numbers of Hapro customers are living their dream of achieving an attractive and vitalizing tan.

Hapro Topaz is the multi-talented appliance from our home tanning range. With its very compact and space-saving size, it offers a surprising abundance of design details and options. All this - at an outstanding price-performance ratio. Options as to the number of lamps and an optional high-pressure face tanner complete its diversity.

TOPAZ 8V

TOPAZ 24 Combi

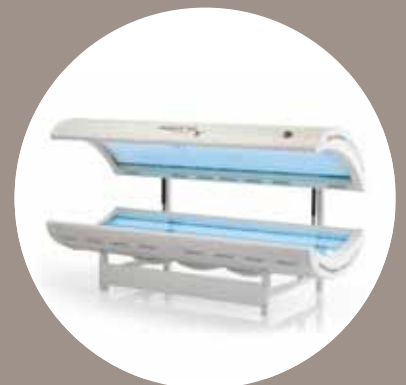

TOPAZ 24 Combi

With its effective price-performance ratio the Hapro Topaz Combi is becoming a favourite home-based asset to general well-being. The variety of different versions, along with the tube options (from 22 to 24 tubes), will provide the right solution for the most varied of requirements. With a full set of optional extras, you can even have a built-in MP3 connection and aroma system.

TOPAZ 22 Combi

If you want to combine generous space with individual reclining comfort yourself, then select the Hapro Jade T. The integral double-articulated gas spring system adjusts the tanning canopy with its 12 tubes, to the ideal height and reclining position for you, and when you have finished sunbathing, it moves back quickly and easily to a space-saving “resting position”.

JADE T

JADE T Lc

With its generous reclining surface, easy-to-reach operating panel, and easy-tilt canopy, the Hapro Jade Combi offers well-being pure and simple. With its high-quality materials, outstanding finish, and elegant colour scheme, the Hapro Jade Combi places the emphasis on luxury. And with the Click-Strip system it also scores when it comes to easy maintenance.

Feel independent

Enjoy the sunshine whenever you want. Boost your well-being. Increase your sense of well-being in the comfort of your own home, whenever you want. Hapro Jade is the byword for maximum comfort and beautiful design. The arched tanning canopy ensures that the tubes are kept at the optimum distance from your body, while ensuring that you have a pleasant sense of space. A body fan (optional) maintains a pleasant tanning climate, and you can set the length of your tanning session on the easy-to-operate analogue timer.

Whichever tube option you decide upon, the built-in strip reflector system (SRS) optimizes the power of the 24 tubes, ensuring maximum efficiency. The 400 W high-pressure face tanner intensifies direct pigmentation and develops palpable warmth. The Lc version has special tubes with an integral tanner in the facial area. The pink-coloured lamp parts increase the tanning effect in the facial area, without extra warmth expansion.

ONYX

ONYX T

Like the Jade, the Onyx is also available on a T-stand. The high-quality gas-spring mechanism and the stable stand are what make this version a favourite for anyone who perhaps prefers to lie on their own bed, or who for space reasons wants to opt for a space-saving solution.

ONYX Combi

Perfect for every environment – with its high gloss finish in Titanium Bronze metallic and attractive colour scheme this tanning appliance complements every interior. Visual wellness in addition to the wellness for your body! Easy to open and close, comfortable reclining surface and great features; 26 tube lamps add to the pleasant relaxing tanning experience.

Feel strong

Enjoyment and a zest for life often go hand-in-hand with the special things in life. Moments of relaxation gain entirely new aspects when aesthetics, quality and lifestyle are enhanced. When you choose the Hapro Onyx you are a true professional. Based on the shape of the Hapro Jade, the Hapro Onyx has special features to make sunbathing more intensive, yet more relaxed.

The appliance has a body fan, and a second fan for the face can be fitted as an optional extra. The ergonomically designed digital display has an audible wake-up feature, gently announcing that the tanning session will end in a few seconds. And you can use the built-in operating time counter at any time to check the recommended service life of the tube lamps. The shape of the sun canopy with its standard, integral, extra-long 1.90 meter tube lamps, combined with the strip reflector system (SRS), or optionally with 5 additional spaghetti tube lamps, all create the best possible balance of tanning. The optional high-pressure facial tanner gives that extra tanning accent, and can be switched of at any time.
