

DIOLASIceer *ice* -1200W

Diode Laser Hair Removal Machine Triple Wave

- COMFORTABLE
- SAFETY
- EFFECTIVE

1200w Higher Power Handpiece

High power and short pulse duration improves both comfort level and efficacy. A fast, comfortable and effective treatment is guaranteed.

USA Coherent import laser bar

The extremely high quality US manufactured laser bars allow for 20,000 hours of continuous laser usage; 100 million shots are guaranteed.

Intelligent operating system

The operator only needs to select the part and skin color to be treated, and the system will automatically generate the recommended treatment parameters. Even an inexperienced operator can easily grasp the operation of the instrument.

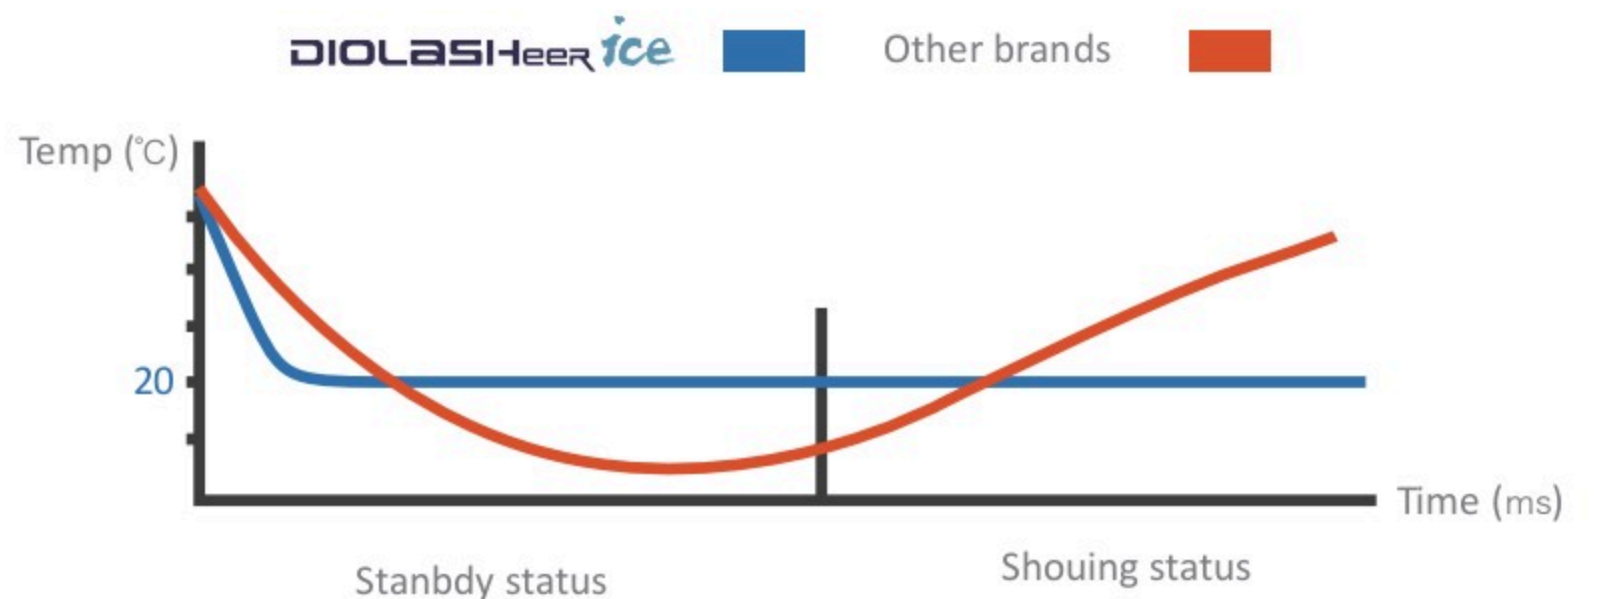

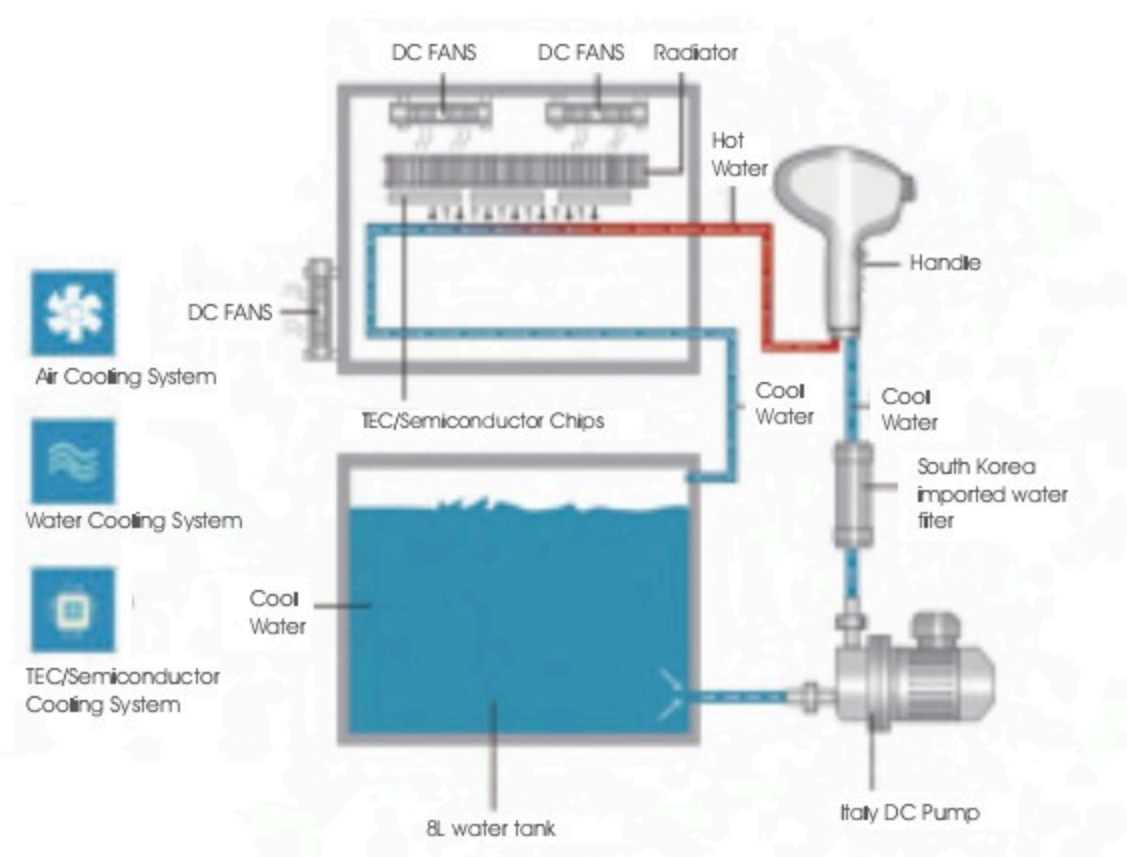

All Skin Color Treatment-1064nm+808nm+755nm

Diolasheer suitable for all skin tones, comfortable treatment, completely painless

Thermostatic intelligent refrigeration system

The instrument is internally loaded with a TEC refrigeration system and an intelligent temperature monitoring sensor to ensure that the operating temperature of the machine is constant at 20 degrees Celsius. Make sure that the water temperature remains the same for 24 hours of continuous operation.

Double Filters

PP Filter

The first stage adopts PP cotton to filter out impurities and prevents laser blockages.

particulates
0.01-0.1µm

PP filter

Metal Ion

Ion filter

Double Protection

Ion Filter

The second stage uses a special Ion filter to filter out metal ions, avoiding inner laser corrosion and prolonging system life.

Summary of advantages

Fast Treatment

"IN-Motion" intelligent mode to bring the fastest the treatment speed to 10shots per second, which will save much more time to do the treatment.

Comfortable Hand Piece

Reduce fatigue after all day laser hair removal treatments with comfortable hand piece design.

Effective

2000W strong power supply and USA imported Laser Stacks, 10 layers and 1200W high power output, effective treatment is guaranteed.

Built To Last

TEC cooling system for water tanks and TEC for sapphire in hand piece, ensure a reliable laser hair removal machine for all day treatments.

Modern Design

A laser hair removal machine designed with lightweight shell and modern look.

Safe On All Skin Types

Gold standard technology with clinical evidence of effective laser hair removal on all skin types.

Easy To Use

Quickly select parameters and operate with Ease for fast laser hair removal treatments.

Zero Consumables

No extra expenses which equate to a high ROI with the Diode ICE laser hair removal machine

Technical Parameter

Laser type	Semiconductor laser
wavelength	1064nm, 755nm, 808nm
Output Mode	pulse output
Control Method	Touch control
Screen Size	10.4 Inch
Energy density	1-80J/cm ² (Deviation≤±2%)
Pulse width range	5-200ms
Spot size	12*12mm
Frequency	1-10HZ
Cooling System	TEC cooling system
Input Power	2500W
Output power	1200W
Voltage	AC220V±10% 10A 50HZ , 110v±10% 10A 60HZ
